

# World Journal of Traditional Chinese Medicine (WJTCM)

The official journal of WFCMS and GP-TCM

## Special Topic on Traditional Chinese Medicine for Cerebral Diseases

# CALL FOR PAPERS

Prof. Jian-Gang Shen

Prof. Kinzo Matsumoto

Prof. Ke-Sheng Dai

Cerebral diseases become major disease burdens worldwide. Given that limited therapeutic strategy is available, development of novel therapeutic approaches and methods for cerebral diseases becomes timely important in the field, not only involving in specialized institutes, but also in primary care institute all over the world. Traditional Chinese Medicine (TCM) has been used for thousand years and accumulated huge histological documents and literatures about potential single herbs and herbal formulas for cerebral diseases. TCM, including acupuncture is increasingly popular in cerebral diseases treatment as its effective therapeutic application with relative fewer side effects. From both clinic and basic scientific level, it would be very exciting to explore the effects and relative mechanisms of TCM for cerebral diseases.

We invite researchers to contribute original research articles as well as review papers on TCM for cerebral diseases, including stroke, neurodegenerative diseases, neuroinflammation diseases, and psychiatric disorders etc., covering from basic research to clinical trials.

Authors can submit their manuscripts via the Manuscript System at <https://mc03.manuscriptcentral.com/wjtcms>.

Potential contents include, but are not limited to:

- Studies on the application of TCM for treating cerebral diseases
- Animal studies exploring novel applications of TCM for treating cerebral diseases
- Studies on mechanisms and pathways involved in the application of TCM for cerebral diseases
- Novel methodologies and technologies of TCM with potential applications to cerebral diseases
- Reviews and meta-analysis on TCM for treating cerebral diseases
- Comparative studies between TCM and modern Western medicine for treating cerebral diseases

### Guest Editors

#### Jian-Gang Shen

MD, PhD, Professor,  
Professor, Associate Director (Research)  
School of Chinese Medicine  
University of Hong Kong
